

CLAIMS:

1. A system to facilitate computer-based commerce, the system including:
 - an offering dispatch module to facilitate communicating a provider offering to a user if the offering is within a category designated by the user as being acceptable for receipt of such offering; and
 - a rewards module to reward the user if the user satisfies a reward criteria, the reward criteria including the user propagating the provider offering to a second user.
2. The system of claim 1, including:
 - a user profile monitor to maintain a user profile, the user profile including one or more user selections from a plurality of categories, each selection associated with an area of interest;
 - a vendor communication module to detect receipt of the provider offering;
 - and
 - an offerings monitor in communication with the provider communication module to identify the offering as associated with an offering category and to store the offering in an offerings database.
3. The system of claim 1, wherein the communicating of the provider offering to the user being without revealing the user's contact information or the user's identity to the provider.

4. The system of claim 2, including a user communication module in communication with the user profile monitor to receive a selection from the user and to store the selection in the user profile, wherein the selection includes one or more of adding a category and removing a category.
5. The system of claim 4, including an intelligent agent to:
 - identify a related category associated with the selection of the at least one category;
 - identify a product associated with the related category; and
 - publish the associated product to the user.
6. The system of claim 5, wherein intelligent agent being to invite the user to select the related category to be included in the user profile, responsive to identifying the user as being interested in the associated product.
7. The system of claim 2, including a statistics generator to automatically generate a value associated with a number of user profiles identified as including the offering category.
8. The system of claim 2, wherein the user profile is independent from the user's communication service provider.
9. The system of claim 2, wherein the offering dispatch module is to:
 - detect a change to the user profile,
 - identify the change as an additional category in the user profile,

identify a new interest offering in the offerings database, the new interest offering associated with the additional category in the user profile, and facilitate communicating the new interest offering to the user.

10. The system of claim 1, wherein the reward criteria includes one or more events resulting from the user propagating the provider offering to the second user, the one or more events selected from a group including:

receiving a completed survey from the second user;
receiving an indication of a purchase by the second user;
receiving an indication of a click through by the second user; and
receiving a testimonial from the second user.

11. The system of claim 1, wherein the reward includes one or more items selected from a group including a credit value, one or more points, and a monetary value.

12. The system of claim 1, wherein the reward being designated to the user or a third party.

13. The system of claim 1, including a spam control module in communication with the offerings monitor to receive a spam complaint, to identify a user associated with the spam complaint, and to take an action in response to the spam complaint.

14. A method to facilitate computer-based commerce, the method including:

communicating a provider offering to a user if the provider offering is within a category designated by the user as being acceptable for receipt of such offering; and

awarding a reward to the user if the user satisfies a reward criteria, the reward criteria including the user propagating the provider offering.

15. The method of claim 14, wherein the communicating of the provider offering to the user includes:

receiving from the user a selection of at least one category from a plurality of categories, the at least one category associated with an area of interest;
storing the selection of the at least one category in a user profile;
detecting receipt of the provider offering;
identifying the provider offering as associated with an offering category; and
storing the provider offering in an offerings database.

16. The method of claim 14, wherein the communicating of the provider offering to the user being without revealing the user's contact information or the user's identity to the provider.

17. The method of claim 15, including:

identifying a related category associated with the selection of the at least one category; and
identifying a product associated with the related category; and
publishing the associated product to the user.

18. The system of claim 17, including inviting the user to select the related category to be included in the user profile, responsive to identifying the user as being interested in the associated product.
19. The method of claim 15, including automatically generating a value associated with a number of user profiles identified as including a specific category.
20. The method of claim 15, including maintaining the user profile independent from the user's communication service provider.
21. The method of claim 15, wherein the communicating of the provider offering to the user includes:
 - detecting a change to the user profile,
 - identifying the change as an additional category in the user profile,
 - identifying a new interest offering in the offerings database, the new interest offering associated with the additional category in the user profile, and
 - communicating the new interest offering to the user.
22. The method of claim 15, wherein the awarding of the reward to the user includes:
 - identifying the provider offering as a propagated offering; and
 - updating the propagated offering with the offering data stored in the offerings database.
23. The method of claim 13, wherein the awarding of the reward to the user is responsive to:

receiving a completed survey from the second user;
receiving an indication of a purchase by the second user;
receiving an indication of a click through by the second user; and
receiving a testimonial from the second user.

24. The method of claim 13, wherein the awarding of the reward to the user includes awarding to the user one or more items selected from a group including a credit value, one or more points, and a monetary value.

25. The method of claim 13, wherein the awarding of the reward to the user includes awarding the reward to a third party, the third party being designated by the user.

26. The method of claim 13, including:

detecting a spam complaint from the user;
identifying a provider associated with the spam complaint; and
taking an action in response to the spam complaint.

27. A method to facilitate computer-based commerce, the method including:

means for communicating a provider offering to a user if the provider offering is within a category designated by the user as being acceptable for receipt of such offering; and

means for awarding a reward to the user if the user satisfies a reward criteria, the reward criteria including the user propagating the provider offering to a second user.
